

LPA Process Improvement Initiative

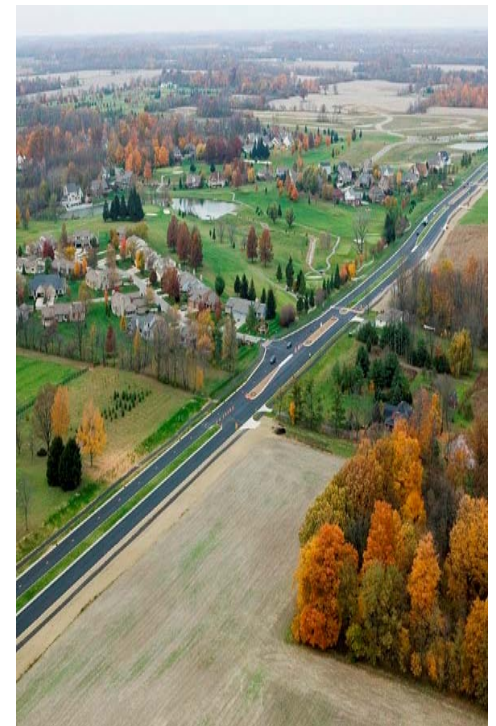

LPA Improvement Initiative

A cooperative effort of INDOT, FHWA, Local Public Agencies, and your professional consultants

<http://www.in.gov/indot/div/projects/LPASection/>

INDOT

LPA Process Improvement Initiative

“You already have the responsibility – now you have the control”

LPA Process Improvement Initiative

Those Involved:

- LPAs
- MPOs
- RPOs
- INDOT
- FHWA
- ACEC (Consultants)
- LTAP

What's Happened

A Leadership Committee was formed to create a policy statement that would reflect the goals of the industry to reduce development time and ensure compliance with federal and state regulation. Input was gathered from questionnaires sent to over 475 Local Public Agencies across the state ascertaining where there were problems within the current program. INDOT district meetings were held to determine other issues. Subcommittees were then formed to develop chapters and create a Guidance Document detailing such issues as Plan Development and Utilities.

Why is this good for Indiana?

- **Reduced Development Time!**
- **Better Communication!**
- **Consistency!**

LPA Initiative was created as a combination of:

- Desire to expedite project development by LPAs, consultants, INDOT, and FHWA
- Desire to empower LPAs by providing them with the tools necessary to develop projects
- Assessment of the program by FHWA

What's Next:

- Continue to gather comments
- Finalize document
- Training, training, training!!! Beginning with INDOT staff in early 2009, sessions for all at Road School, and holding certification classes in March and April
- Continue to develop and evolve Guidance Material
